

News Letter Spring 2024

IT DEPARTMENT

New Teams

New Teams will be released by March 31st.
Classic Teams users who haven't updated to the new Teams version will be automatically upgraded.

Some of the new features are:

Performance Optimization: The new Teams app is reported to be two times faster with up to 50% less memory and disk space usage compared to classic Teams.

Enhancements for Mac Users: Significant performance improvements for Mac users, including faster chat and channel switching.

Simplified User Experience: The new Teams version offers a streamlined user interface, enhanced personalization options, and improved support for users with color sensitivity.

Multi-Tenant Organizations (MTO): New Teams introduce features like MTO and Multi-tenant, Multi-account (MTMA) for seamless cross-tenant communication and collaboration.

New Microsoft Authenticator-app incoming

Microsoft Authenticator app is introducing exciting new features, allowing users to visually track the origin of requests globally and identify the system making the Multi factor-request.

This enhances security by providing insights into the request's source and associated application, ensuring a more transparent and secure authentication experience.
